International Finance Corporation (IFC)

Dear Sir or Madam,

I am applying for the operations analyst position at the International Finance Corporation's office in Haiti. I am an applied economist with several years of experience in economic analysis and database management. Most importantly, I have worked as modeling analyst at the Directorate of Economic and Social Planning of the Ministry of Planning and Extern Cooperation.

I successfully completed my undergraduate studies at the School of Planning and Applied Economics (C.T.P.E.A). This rigorous training in applied economics gave me a sound knowledge of statistical methods, economic analysis and modeling. As analyst at the the Ministry of Planning and External Cooperation, I have developed a critical thinking and an hands-on approach to understand and analyze key development in public policies and project management. Most importantly, I have periodically monitored the evolution of macroeconomic aggregates and I have participated in workshops on state budget together with the staff of the Ministry of Economy and Finance. Additionally, I was part of the team in charge of the Information and Development Planning Model which is a planing tool aiming to guide decision making and to improve governance in Haiti.

Given my experience in project management and my background in applied economics, I believe that I can bring valuable contribution to the C.L.A.H.T team. I am fluent in French and English and I have extensive experience of Microsoft Office, R, Python, JavaScript, MySQL and MongoDB.

I enjoy working in a dynamic and diverse work environment with colleagues from different nationalities and background. I take great pleasure in working on challenging projects as well as participating in the decision-making process.

While requesting your attention to my application, please accept, Madam, Sir, the expression of my respectful consideration.
