Professional Profile

Monitoring and evaluation professional with over five years of experience in Haiti, three of them as **M&E Officer on an HIV program** where I ran the routine reporting of multi-site clinics and reported **MER indicators to USAID through DATIM (DHIS2)**. My work is the part of M&E that has to survive verification: Data Quality Assessment protocols established and supervised, figures traced back to the source register, and digital collection standardized so data is correct at the point of entry rather than repaired afterwards. Trained as an **Applied Economist** and working in parallel as a **data engineer**, I also administer the databases and collection systems that health facilities depend on, and not only the indicators they produce. Based in Port-au-Prince; fluent in French, English, and Haitian Creole.

Core Competencies

- **M&E Systems & Routine Indicator Reporting:** Monitoring plans, logical frameworks, results chains and Indicator Tracking Tables; monthly, quarterly, semiannual and annual reporting cycles from multi-site health facilities; donor indicator reporting through DATIM/MER; survey planning and management; qualitative and quantitative analysis with required disaggregation.
- **Health Information Systems & Data Quality:** DQA protocols established and supervised, with verification against source records and corrective actions tracked through closure; completeness rates reported alongside every indicator; administration of MySQL, CommCare, mWater and ODK collection systems; version deployment across sites, role-based access control, incident documentation and secure storage.
- **Capacity Building & Coordination:** Training of health-facility staff, enumerators and field data-collection teams on collection tools, data quality and analysis; technical oversight of M&E personnel and production of technical guides; coordination with government counterparts (MSPP, DINEPA) and translation of technical findings for nontechnical leadership.

Health M&E and Information Systems Experience

- Oct 2021 – Aug 2024 **Monitoring & Evaluation Officer, Impact Youth Project, Caris Foundation International, Haiti**
- **Routine Health Reporting:** Ran the monitoring cycle for an HIV program across multi-site clinics, consolidating facility data on schedule and reporting **MER indicators to USAID through DATIM**, PEPFAR's DHIS2-based reporting platform.
 - **Collection Systems:** Implemented and administered the digital collection systems behind that reporting (CommCare, HIVHaiti, MySQL), standardizing forms and data flows between sites.
 - **Data Quality Assurance:** Established and supervised DQA protocols on MySQL-integrated data, tracing reported figures back to source records and following corrective actions to closure rather than to notation.
 - **Supervision & Capacity Building:** Supervised field data-collection staff across sites and provided technical oversight to M&E personnel on collection procedures and data-quality controls.
 - **Reporting & Dashboards:** Automated activity reporting with Python and SQL, reducing manual processing time by 40%; maintained program dashboards on AWS (Quarto) and Power BI for weekly indicator monitoring by program management.
- Jan 2026 – Mar 2026 **Data Analyst & MEAL Consultant, Anseye Pou Ayiti, Haiti (Remote)**
- Defined the data collection strategy and implemented Key Performance Indicators for multi-sectoral leadership programs.
 - Coded XLSForm instruments for **ODK** and KoboToolbox with skip logic and validation constraints, and maintained the Python integration scripts on AWS.
 - Supervised the quality of incoming field data, administered the ODK/Admin Panel system, and trained field agents on the collection tools.

- Oct 2023 – **mWater & Data Analyst Consultant**, *HANWASH*, Remote (Upwork)
- Jan 2026
- **M&E Design:** Refined project MEAL plans and Indicator Tracking Tables aligned with JMP standards for water and sanitation programs.
 - **Data Management:** Deployed complex geospatial surveys on mWater, administered the database including cleaning and merging of duplicate records, and resolved field collection issues to maintain data integrity.
 - **Automation & Training:** Built automated dashboards (mWater, Power BI) connected to collection APIs for real-time stakeholder reporting; produced technical guides and trained teams on their use.
- Nov 2015 – **Economist – Economic Planning Service (DPES)**, *Ministry of Planning and External Cooperation (MPCE)*, Port-au-Prince
- Aug 2023
- Contributed to the monitoring reports on the execution of the 2014–2016 Triennial Investment Plan; assigned to the statistics and modeling unit, where I helped build the “Development Planning Model”, a forecasting, simulation and public-policy impact-analysis tool; monitored macroeconomic indicators alongside the Ministry of Economy and Finance.

Database & Systems Engineering Experience

- Feb 2026 – **Software Engineer (Fullstack)**, *Tekkod LLC*, Remote
- Present
- Leading a mobile infrastructure modernization program with offline-first reliability and data security for field use; built Looker Studio dashboards with search and filtering for operational visibility.
- Mar 2021 – **Backend Developer & Data Engineer**, *Tekkod LLC*, Remote
- May 2024
- Administered relational databases under concurrent access and resolved the failures that make a system unusable in the field — a login path reduced from 36 seconds to under half a second by eliminating N+1 query loops, and composite indexes that removed lock contention; implemented ETL pipelines (Apache Beam) migrating MongoDB data to BigQuery, and secure RESTful services (FastAPI, JWT) with role-based access control.
- Nov 2015 – **Software Consultant & Data Integration Specialist**, *CassionSoft (UNOPS Project)*, Haiti
- Mar 2021
- Delivered data integration work on a United Nations project, with first-hand exposure to UN procedures and documentation standards; implemented RBAC authentication systems (OAuth2/JWT) and validated complex integration logic through rigorous unit testing.

Education

- 2010–2014
- Advanced Studies Diploma in Applied Economics — C.T.P.E.A (Centre de Techniques de Planification et d'Économie Appliquée), Port-au-Prince
- 2009–2010
- High School Diploma (Honors) — Institution Saint-Louis de Gonzague
- Self-learning
- FlatIron School (Software Engineering), CodeWithMosh, Udemy

Technical Skills

- Health Information Systems
- DHIS2 / DATIM (MER indicator reporting)**, CommCare, HIVHaiti, mWater, DQA protocols, Indicator Tracking Tables
- Mobile Data Collection
- ODK (Open Data Kit)**, **KoboToolbox**, **XLSForm**, skip logic and validation constraints, survey design and management
- Analysis & Reporting
- MS Excel (Advanced)**, **MS Word**, **MS Access**, **MS PowerPoint**, **GSuite**, **Power BI (Expert)**, SQL, Python (Pandas), R (Quarto), Stata, Looker Studio, Tableau, statistical modeling and sampling
- Infrastructure Languages
- MySQL, PostgreSQL, MongoDB, SQLite, Azure, AWS, Google Cloud (BigQuery), Docker, Git
- French (Native)**, **Haitian Creole (Native)**, **English (Fluent)**
