Professional Profile

Data management professional with over 5 years of experience bridging the gap between **MEAL** (Monitoring, Evaluation, Accountability, and Learning), **database administration**, and **software engineering**. Expert in designing, securing, cleaning, and maintaining relational and non-relational database systems for humanitarian and development programs in Haiti. Unique hybrid profile combining the analytical rigor of an applied economist (statistical modeling) with technical mastery of mobile collection tools (KoboToolbox, ODK, CommCare, XLSForm) and data workflows (SQL, Python, Power BI, Looker Studio). Locally available in Port-au-Prince.

Core Competencies

- **Database Management & Administration:** Modeling, maintenance, advanced SQL query optimization, indexing, backup/restore procedures, and data deduplication.
- **Mobile Data Collection (MDC):** Advanced XLSForm coding, designing complex beneficiary targeting logic under KoboToolbox, ODK, and CommCare.
- **Data Quality Assurance (DQA):** Setting up automated validation protocols, detecting/rectifying discrepancies, and cleaning field databases.
- **Data Analysis & Visualization:** Building interactive dashboards in Power BI, Looker Studio, and Quarto, and performing econometric and statistical analysis.
- **Training & Technical Support:** Designing operational guides, training enumerators in the field, and troubleshooting hardware/software database issues.

Professional Experience

Feb 2026 – Present **Software Engineer (Database & Performance)**, *Tekkod LLC*, Port-au-Prince (Remote)

- Optimized backend query performance for the "Steam The Streets" project, reducing login latency from 36s to <0.5s by eliminating inefficient database query patterns (N+1 query loops).
- Designed and implemented composite database indexes to prevent locks and deadlocks under heavy concurrent access, ensuring database transactional stability.
- Audited and cleaned inconsistent data formats, standardized relational schemas, and automated data validation rules for incoming records.
- Maintained operational dashboards via Looker Studio with multi-tier search and filter queries for field teams.

- Jan 2026 – **Data Analyst & MEAL Consultant**, *Anseye Pou Ayiti*, Port-au-Prince (Remote)
- Mar 2026
- Defined data collection strategies and coded complex surveys in XLSForm for ODK and KoboToolbox with advanced skip logic and validation criteria.
 - Administered data integration scripts on AWS servers to guarantee clean, consolidated central databases.
 - Supervised data quality of field submissions and resolved missing data, validation errors, and discrepancies.
 - Coordinated and led technical training sessions for field enumerators on digital collection tools.
- Oct 2023 – **mWater & Data Analyst Consultant**, *HANWASH*, Port-au-Prince (Remote)
- Jan 2026
- Refined project MEAL frameworks and Indicator Tracking Tables (ITT) for WASH programs in line with JMP standards.
 - Programmed complex geospatial surveys and administered the central mWater database, regularly cleaning records and merging duplicate entries.
 - Created automated dashboards in Power BI connected via APIs to data pipelines for real-time indicator tracking.
- Mar 2021 – **Backend Developer & Data Engineer**, *Tekkod LLC*, Port-au-Prince (Remote)
- May 2024
- Built secure RESTful web services (FastAPI) and modeled relational PostgreSQL databases using SQLAlchemy.
 - Implemented automated ETL pipelines (Apache Beam) to extract, transform, and load MongoDB data into BigQuery (GCP) for statistical reporting.
 - Validated database structure integrity using automated unit tests.
- Oct 2021 – **Monitoring & Evaluation Officer**, *Impact Youth Project*, *Caris Foundation International*, Port-au-Prince
- Aug 2024
- Managed MySQL and CommCare databases for multi-site health clinics and community programs.
 - Programmed automated data extraction routines (Python/SQL), reducing manual import/export processing time and errors by 40%.
 - Established and executed Data Quality Assessment (DQA) protocols for database scrubbing and validation.
 - Maintained local servers and resolved hardware/software IT incidents for field collection teams.
- Nov 2015 – **Software Consultant & Data Integration Specialist**, *CassionSoft (UNOPS Project)*, Port-au-Prince
- Mar 2021
- Designed complex relational database schemas and implemented secure authentication systems.
 - Authored database migration scripts and unit tests to validate database CRUD operations.
- 2014 – 2015 **Economist – Economic Planning Service**, *Ministry of Planning (MPCE)*, Port-au-Prince
- Monitored macroeconomic indicators and managed public sector statistics for socio-economic impact reports.

Education

- 2010–2014 Advanced Studies Diploma in Applied Economics, C.T.P.E.A (Port-au-Prince)
- 2009–2010 High School Diploma (Honors), Institution Saint-Louis de Gonzague (Port-au-Prince)

Technical Skills

- DB Admin **SQL (MySQL, PostgreSQL, SQL Server)**, MongoDB, BigQuery (GCP), Indexing, Query Profiling
- MDC Tools **KoboToolbox, ODK, XLSForm (Expert)**, CommCare, mWater, HIVHaiti

Programming **Python** (Pandas, FastAPI), Javascript, RESTful APIs, Git, Docker
Visualization **Power BI (Expert)**, Looker Studio, Quarto, RMarkdown
Languages French (Native), Haitian Creole (Native), English (Fluent)
