Professional Profile

Multidisciplinary professional with over 10 years of experience bridging the gap between **MEAL** (Monitoring, Evaluation, Accountability, and Learning), **Data Science**, and **Software Engineering**. Expert in designing digital data systems for humanitarian and development programs. I offer a unique hybrid profile: the analytical rigor of an **Applied Economist** (statistical modeling specialist) combined with the technical capability of a **Fullstack Developer** and **Data Engineer**. Expert in automating ETL pipelines, building real-time dashboards, and optimizing digital collection tools (CommCare, ODK).

Core Competencies

- **MEAL & Digital Transformation:** Designing logical frameworks, ITTs, and transitioning to "Digital-First" systems.
- **Data Engineering & Modeling:** ETL pipeline automation, advanced SQL, statistical modeling, and complex trend analysis.
- **Fullstack Development:** Secure API architecture (FastAPI), mobile integration (React Native), and complex state management.
- **Infrastructure & Cloud:** Proficient in Azure, AWS, Google Cloud, Docker, and CI/CD.
- **Digital Collection:** Advanced implementation of CommCare, mWater, KoboToolbox, and XLSForm/ODK standards.
- **Visualization:** Expert in Power BI, Looker Studio, and Quarto for donor-ready reporting.

Professional Experience

Feb 2026 – **Software Engineer (Fullstack)**, *Tekkod LLC*, Remote

- Present
- Led the "STS Mobile App Modernization" project, upgrading React Native (0.65.1 to 0.74.x) and migrating to the New Architecture (Hermes, Bridgeless Mode).
 - Modernized mobile infrastructure: Java 17, Gradle 8.8, and migrated to Firebase v22 (Modular API).
 - Full refactor of UI components (Yoga 3.0) and fixed asynchronous state updates.
 - Optimized operational visibility through advanced Looker Studio dashboards with search and filtering.

- Jan 2026 – **Data Analyst & MEAL Consultant**, *Anseye Pou Ayiti*, Remote
- Mar 2026
- Implemented Key Performance Indicators (KPIs) for multi-sectoral leadership programs (AL, PL, DL).
 - Designed data collection strategies and tools via Google Forms and ODK with validation protocols.
 - Maintained Python scripts on AWS ensuring data integrity and managed the ODK/Admin Panel system.
 - Led training sessions for field teams on the effective use of digital collection tools.
- Oct 2023 – **mWater & Data Analyst Consultant**, *HANWASH*, Remote (Upwork)
- Jan 2026
- **MEAL Design:** Refined project MEAL plans and Indicator Tracking Tables (ITT) aligned with JMP standards.
 - **Data Management:** Deployed complex mWater surveys and resolved field collection issues to maintain 100% data integrity.
 - **Automation:** Built automated dashboards (mWater, Power BI) for real-time stakeholder reporting.
 - **Capacity Building:** Produced technical guides and trained teams on digital collection and dashboard usage.
- Mar 2021 – **Backend Developer & Data Engineer**, *Tekkod LLC*, Remote
- May 2024
- Developed secure RESTful web services (FastAPI, JWT) and applied the repository pattern.
 - Implemented ETL data pipelines via Apache Beam to migrate MongoDB data to BigQuery (GCP).
 - Managed infrastructure via Docker and deployed analytical dashboards on Looker Studio.
 - Full OpenAPI documentation and rigorous version control via Git.
- Oct 2021 – **Monitoring & Evaluation Officer**, *Impact Youth Project, Caris Foundation International*
- Aug 2024
- **Collection Systems:** Implemented digital data collection systems (Commcare, HIVHaiti), optimizing multi-site data flows.
 - **Automated Reporting:** Developed reports using Python/SQL, reducing manual processing time by 40%.
 - **Data Quality Assurance (DQA):** Established and supervised DQA protocols for MySQL-integrated data.
 - **Dashboards:** Maintained program dashboards via AWS (Quarto) and Power BI for weekly KPI monitoring.
- Nov 2015 – **Software Consultant & Data Integration Specialist**, *CassionSoft (UNOPS Project)*
- Mar 2021
- Implemented RBAC authentication systems (OAuth2/JWT) and REST API services.
 - Validated complex data integration logic through rigorous unit testing.
 - OpenAPI documentation and collaboration on data flow architecture.
- Nov 2015 – **Economist – Economic Planning Service (DPES)**, *Ministry of Planning and External Cooperation (MPCE)*, Port-au-Prince
- Aug 2023
- Contributed to the monitoring reports on the execution of the 2014–2016 Triennial Investment Plan.
 - Assigned to the statistics and modeling unit: helped build the “Development Planning Model”, a forecasting, simulation and public-policy impact-analysis tool.
 - Participated in macroeconomic framing meetings with the Ministry of Economy and Finance (MEF) and monitored macroeconomic indicators.

Education

- 2010–2014 Advanced Studies Diploma in Applied Economics, C.T.P.E.A
- 2009–2010 High School Diploma (Honors), Institution Saint-Louis de Gonzague
- Self-learning FlatIronSchool (Software Engineering), CodeWithMosh, Udemy

Technical Skills

Engineering & Dev	Python (FastAPI, SQLAlchemy, Pandas), SQL, Docker, Git, CI/CD, React, React Native
Data & MEAL	CommCare, ODK, XLSForm, mWater , Kobo, HIVHaiti, Statistical Modeling
Visualization	Power BI (Expert) , Looker Studio, RMarkdown, Quarto, Plotly, Streamlit
Infrastructure	Azure, AWS, Google Cloud (BigQuery), MySQL, PostgreSQL, MongoDB
Languages	French (Native), English (Fluent), Haitian Creole (Native)

Distinctive Strengths

Unique ability to translate complex business processes into robust data and software architectures.

Commitment to code quality, data security, and process automation.

Team spirit, analytical rigor, and continuous curiosity for technology (IA, Power Platform).
