Professional Profile

MEAL professional with over five years of experience across three sectors in Haiti — health, water and sanitation, and education — designing the systems that make program evidence credible: logical frameworks and Indicator Tracking Tables, Data Quality Assessment protocols established and supervised, and digital collection standardized so that data is correct at the point of entry rather than repaired afterwards. Trained as an **Applied Economist** and working in parallel as a **data engineer**, I can build, secure, and administer the databases and dashboards a country office depends on, not only specify them. Based in Port-au-Prince; fluent in French, English, and Haitian Creole.

Core Competencies

- **MEAL Frameworks & Results-Based Management:** Logical frameworks, results chains, Indicator Tracking Tables (ITT), monitoring plans, baselines, targets and required disaggregation.
- **Data Quality & Protection:** DQA protocols established and supervised, verification against source records and corrective actions tracked through completion; relational database administration, role-based access control, secure storage, de-duplication of beneficiary lists.
- **Supervision, Capacity Development & Coordination:** Supervision of enumerators and field data-collection staff, technical oversight of M&E personnel, training on collection tools and data quality; work with government counterparts (DINEPA, MSPP) and translation of technical findings for nontechnical leadership.

MEAL & Program Quality Experience

Jan 2026 – **Data Analyst & MEAL Consultant, Anseye Pou Ayiti, Haiti (Remote)**

- Mar 2026
- Defined the data collection strategy and implemented Key Performance Indicators for multi-sectoral leadership programs.
 - Coded XLSForm instruments for ODK and Google Forms with skip logic and validation constraints, and maintained the Python integration scripts on AWS.
 - Supervised the quality of incoming field data, administered the ODK/Admin Panel system, and trained field agents on the collection tools.

Oct 2023 – **mWater & Data Analyst Consultant, HANWASH, Remote (Upwork)**

- Jan 2026
- **MEAL Design:** Refined project MEAL plans and Indicator Tracking Tables (ITT) aligned with JMP standards for water and sanitation programs.
 - **Data Management:** Deployed complex geospatial surveys on mWater, administered the database, and resolved field collection issues to maintain data integrity.
 - **Automation & Capacity Building:** Built automated dashboards (mWater, Power BI) connected to collection APIs for real-time stakeholder reporting; produced technical guides and trained teams on their use.

- Oct 2021 – **Monitoring & Evaluation Officer**, *Impact Youth Project, Caris Foundation International*, Haiti
- Aug 2024
- **Collection Systems:** Implemented digital data collection systems (CommCare, HIVHaiti) across multi-site health programs, standardizing forms and data flows between sites.
 - **Data Quality Assurance:** Established and supervised DQA protocols for MySQL-integrated data, tracing reported figures back to source records and following corrective actions to closure.
 - **Supervision:** Supervised field data-collection staff across sites and provided technical oversight to M&E personnel on collection procedures and data-quality controls.
 - **Reporting & Dashboards:** Developed activity reports using Python and SQL, reducing manual processing time by 40%; maintained program dashboards on AWS (Quarto) and Power BI for weekly indicator monitoring by program management.
- Nov 2015 – **Economist – Economic Planning Service (DPES)**, *Ministry of Planning and External Cooperation (MPCE)*, Port-au-Prince
- Aug 2023
- Contributed to the monitoring reports on the execution of the 2014–2016 Triennial Investment Plan; assigned to the statistics and modeling unit, where I helped build the “Development Planning Model”, a forecasting, simulation and public-policy impact-analysis tool; monitored macroeconomic indicators alongside the Ministry of Economy and Finance.

Data Engineering & Systems Experience

- Feb 2026 – **Software Engineer (Fullstack)**, *Tekkod LLC*, Remote
- Present
- Leading a mobile infrastructure modernization program with offline-first reliability and data security for field use; built Looker Studio dashboards with search and filtering for operational visibility.
- Mar 2021 – **Backend Developer & Data Engineer**, *Tekkod LLC*, Remote
- May 2024
- Implemented ETL pipelines (Apache Beam) migrating MongoDB data to BigQuery and administered relational databases under concurrent access; developed secure RESTful services (FastAPI, JWT) with role-based access control and full OpenAPI documentation.
- Nov 2015 – **Software Consultant & Data Integration Specialist**, *CassionSoft (UNOPS Project)*, Haiti
- Mar 2021
- Delivered data integration work on a United Nations project, with first-hand exposure to UN procedures and documentation standards; implemented RBAC authentication systems (OAuth2/JWT) and validated complex integration logic through rigorous unit testing.

Education

- 2010–2014 Advanced Studies Diploma in Applied Economics — C.T.P.E.A (Centre de Techniques de Planification et d'Économie Appliquée), Port-au-Prince
- 2009–2010 High School Diploma (Honors) — Institution Saint-Louis de Gonzague
- Self-learning FlatIron School (Software Engineering), CodeWithMosh, Udemy

Technical Skills

- MEAL Tools **KoboToolbox, ODK, XLSForm**, CommCare, mWater, HIVHaiti, logical frameworks, ITT, DQA protocols
- Analysis **Advanced Excel, Power BI (Expert)**, SQL, Python (Pandas), R (RMarkdown/Quarto), Looker Studio, statistical modeling and sampling
- Infrastructure MySQL, PostgreSQL, MongoDB, Azure, AWS, Google Cloud (BigQuery), Docker, Git
- Languages **French (Native), English (Fluent), Haitian Creole (Native)**
