Professional Profile

Result-oriented professional with over 5 years of experience in Monitoring, Evaluation, Accountability, and Learning (MEAL) and data systems. Expert in designing MEAL frameworks, automating data pipelines, and creating advanced visualization tools to support evidence-based decision-making in humanitarian and development contexts. Proven track record in aligning project indicators with logical frameworks and donor requirements (Rotary International, USAID).

- Key Strengths
- **MEAL System Design:** Developing project MEAL plans, logframes, and indicator tracking tables (ITT);
 - **Data Automation & Integration:** Advanced SQL, ETL, Python, and digital collection tools (Commcare, mWater, Kobo);
 - **Reporting & Visualization:** Expert in Power BI, Looker Studio, RMarkdown, and Quarto for donor-ready reporting;
 - **Data Quality & Analysis:** Implementing DQA protocols and performing complex trend analyses;
 - **Technical Versatility:** Secure API development (FastAPI, Docker) and cloud infrastructure (AWS, GCP);
 - **Analytical Foundation:** Background in applied economics with a focus on quantitative research.

Professional Experience

Feb 2026 – **Software Engineer, Tekkod LLC, Remote**

- Present
- Lead the "STS Mobile App Modernization" project, upgrading React Native from 0.65.1 to 0.74.x.
 - Migrated the architecture to Hermes engine, Java 17, and Gradle 8.8, enabling Bridgeless Mode.
 - Performed a full migration to Firebase v22 (Modular API) and replaced deprecated notifications with @notifee/react-native.
 - Conducted a Yoga 3.0 UI Audit to ensure layout consistency and React 18 compatibility.
 - Refactored core components and fixed asynchronous state updates in RewardsModal.
 - Update the looker studio dashboard to add search and filter capabilities.

Oct 2023 – **mWater & Data Analyst Consultant, HANWASH, Remote (Upwork)**

- Jan 2026
- **MEAL System Design:** Actively participated in the conception and refinement of the project MEAL plan, ensuring alignment with the logical framework and JMP standards.
 - **Indicator Tracking:** Developed and maintained the Indicator Tracking Table (ITT) to monitor project progress and ensure data-driven adjustments.
 - **Data Management:** Designed and deployed complex mWater surveys; resolved field data collection issues to maintain high data integrity.
 - **Visualization:** Created automated dashboards (Looker Studio, Power BI, Plotly) for stakeholder reporting and strategic decision-making.
 - **Capacity Building:** Produced technical guides and trained field teams on digital data collection and quality protocols.

Mar 2021 – **Backend Developer, Tekkod LLC**

- May 2024
- Part-time contract. Developed RESTful web services following best practices.
 - Implemented Docker containers and deployment pipelines. Secured APIs with JWT authentication.
 - Applied repository pattern, documented endpoints, and versioned via Git.
 - Built data pipeline to migrate MongoDB data to BigQuery via Apache Beam.
 - Created and maintained Looker Studio dashboards. Contributed to frontend tasks for React and React Native projects.

Oct 2021 – **Monitoring & Evaluation Officer, Impact Youth Project, Caris Foundation International**
Aug 2024

- **System Setup:** Designed and implemented digital data collection systems using Commcare and HIVHaiti, optimizing data flows for multi-site programs.
- **Automated Reporting:** Developed automated activity tracking and donor reports using Python and SQL, reducing reporting turnaround time.
- **Data Quality Assurance:** Established and oversaw DQA protocols, ensuring the accuracy and reliability of MySQL-integrated data.
- **Dashboard Deployment:** Created and deployed weekly program dashboards via AWS using RMarkdown and Quarto to monitor key performance indicators (KPIs).
- **Performance Monitoring:** Maintained the EID Power BI dashboard, providing biweekly updates and trend analyses for project management.

Nov 2015 – **Software Development Consultant (UNOPS Project), CassionSoft**

- Mar 2021
- Developed a REST API service for form analysis with OAuth2 / JWT authentication.
 - Implemented authorization strategies and complete technical documentation.

2014 – 2015 **Economist, Ministry of Planning and External Cooperation**

- Monitored macroeconomic indicators, contributed to public policy reports, and collaborated with modeling teams for socio-economic simulations.

Education

2010–2014 Advanced Studies Diploma in Applied Economics, C.T.P.E.A

2009–2010 High School Diploma (Philosophy, Honors), Institution Saint-Louis de Gonzague

Self-learning FlatIronSchool, CodeWithMosh, Udemy

Technical Skills

Languages Python, FastAPI, SQLAlchemy, Pydantic, Pandas, Numpy, Plotly, Docker, Git, React, React Native

Frameworks

Databases MySQL, PostgreSQL, SQL Server, MongoDB (Beanie, Pymongo), BigQuery

Tools & Automation Commcare, Streamlit, Power BI, Looker Studio, RMarkdown, Quarto, Apache Beam, AWS, Google Cloud, VS Code

Methodologies CI/CD, API Documentation, Unit Testing, Monitoring & Metrics, Data Integration (ETL)

Languages French (fluent), English (fluent), Creole (native)

Distinctive Strengths

Strong ability to quickly understand business processes and translate them into technical solutions.

Commitment to code quality, security, and performance. Team spirit, rigor, and continuous curiosity for technology (AI, automation, Power Platform).
